

Technical information
aluminium-covered skirtings on MDF coreboard

Substrate material:	The substrate material is made from MDF (Medium Density Fibreboard) and corresponds to Emission Class E1 under EN 120, the tolerances in the dimension comply with EN 324-1 and the moisture content corresponds to EN 322. The production quality complies with EN 622-5. The density is approx. 680 kg/m ³ .
Glue:	The glue used is an EVA hot-melt adhesive with a thermal stability of approx. 150°C, which is not subject to marking regulations under the German Hazardous Substances Ordinance (GefStoffV) and corresponding EU directives.
Film:	Thinly-rolled aluminium foil, brushed, in silver.
